

General questions

Can I link to another web shop from my Shopitag shop?

Yes, if you want your customers to be able to surf to your full-fledged web shop from your Shopitag pop-up shop, you can link it. Do keep in mind that people don't tend to like having to visit several pages to get what they're looking for, so consider whether a link like that is actually worth the effort to implement. Also, this particular feature is available only in our Silver and Gold formulas.
